CORONA - Film loading at Building L

Ed Green trip report 12/3/60 visit COR-1029 6 Dec 1960

There has been a great improvement in the general loading operations. This cannot be ascribed solely to occupancy of the new building because it takes very little effort to make a pig wallow out of a palace. In spite of changes in personnel, the people are more professional acting, there is more system, in the operations as well as on paper, and more is accomplished with less effort and less fumbling and retracing of steps. I ascribe much of this to [redacted] and to [redacted] of Itek.
